

Solar

Your partner for
Fastening and
Assembly Technology

BOLLHOFF

Your challenges – our solutions to the solar power industry

Your benefit – our competence

- Application engineering: Technical know how and expert knowledge of many years
- Design new applications: Joining of corner profiles on the solar module, attachment solutions on-roof / inside-roof or open air assembly
- Increase efficiency in your assembly

Develop efficient fastening designs for your products?

RIVCLINCH® corner joint on the solar module in only one step

Joining without a fastening element?

RIVCLINCH® technology to join sheets using a mechanical interlock

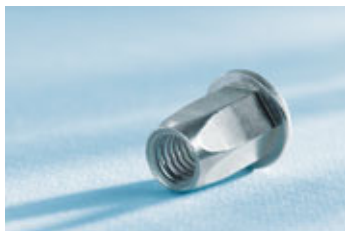

Optimized fastenings by self-pierce riveting?

RIVSET® Self-pierce riveting for high-strength, process-reliable fastenings

High-speed joining?

RIVTAC® Portable – a new dimension in mechanical joining

Deep threads in thin-walled components?

RIVKLE® blind rivet nuts and studs – also in stainless steel!

Screw-driving – hand-held or fixed?

UNIQUICK® screw-driving units and hand-held screwdrivers

***Together with you, we strive to be a step ahead.
